

Quarterly magazine curated by and for the Kyle of Sutherland children

**Bonar Bridge Primary**  
children created some amazing poppy themed artwork. Nursery pupils decorated stones and placed them in the War Memorial.

# Remembrance day art

Local schools pupils created wonderful poetry, artworks and models

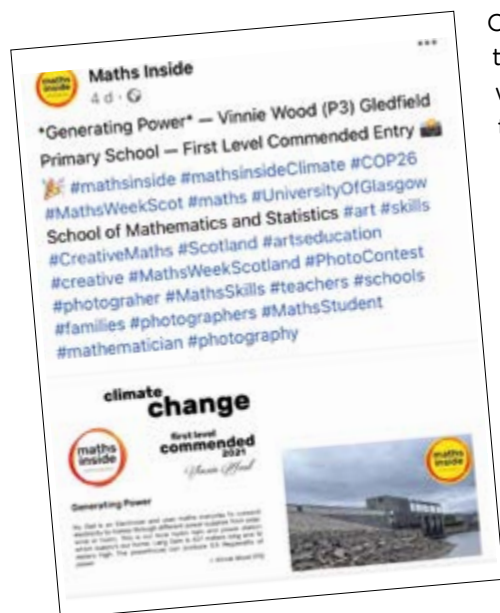

## **Gledfield Primary School.**

As well as observing a minute's silence to commemorate Remembrance Day, pupils from P1-7 carefully created peg models of armed forces and medical personnel. They added lots of wonderful details. There are plans to visit the war memorial in the near future.

## #mathsweekscotland

Children were invited to enter a Scotland wide photo competition called "Maths Inside". We had some great entries from Santiago, Annabelle and Vinnie. Vinnie has done exceptionally well and has received a Commended Award for his First Level entry. Well done Vinnie, you have done Gledfield proud!!

## #swimming

On Thursday Gledfield Primary School P5-7 go on a big bus to Edderton to pick up the Edderton P5-7 pupils. Then we go to TRACC for swimming. Sometimes we see pupils who have moved up to secondary school and say hi to them. The swimming lesson is 20 minutes long. It's important to learn to swim so you can have fun in the pool and you are not scared in the water. It is fun to jump in and dive under the water to collect objects. We get changed really quickly and get back on the bus, go back to Edderton to drop pupils off and then go back to Gledfield. We have our break when we get back. **By Dylan, P6 and Kieran, P7**

Andy Mair came to Gledfield Primary to teach P5-7 rugby for four weeks. Some of us play rugby out of school but some of us had never played before. We all learned how to kick the ball properly by remembering 'laces for aces'. To catch the ball properly you make your arms like a bread basket. I really enjoyed rugby tennis and doing fancy throws touch rugby. We played games to help us practise catching and passing too. There was a lot of running and communicating with your teammates to be able to score a try. We were all sorry when our sessions were finished. It was a fun way to be active and learn some new skills. We hope we will get to play rugby again soon. **By Magnus and Rebekah, P6**

Our nursery has been investigating water, this started from the nursery children's interest in water. They have looked at the different states water can take, made bubble art, looked at ocean animals and had lots of outdoor fun.

We collected 23 shoeboxes for Blythwood's Shoebox appeal, we have 23 pupils in P1-7 so this is an incredible amount, our families have been very generous. On 19th November we had a fun filled day to raise money for Children in Need. Our pupil council organised a non-uniform day and a "Strictly Come Dancing" themed dance competition. We raised almost £50, thank you again to everyone who donated.

## #juniorleadership

Junior Leadership P6 & P7 – training to understand the elements needed to run a safe and fun session for younger children.

## Bonar Bridge Primary

The children received their Book Bug Bags from Linda at the library. Usually Linda would come in and visit us and do some lovely activities with the children but sadly we are not allowed visitors at the moment. It was still lovely for the children to receive their bags.

## #remembrancedaypoetry

## #poppyonastone

This term the children took part in some remembrance day activities. This included painting a poppy on a stone and then placing it at the War Memorial as a way of remembering and saying thank you to all the brave soldiers.

## #climatetalks

Rosehall Primary

We have been learning about this year's COP26 and making independent PowerPoints based on climate change. We learnt about causes, effects and many ways to help the environment. Then we shared our PowerPoints with each other at the end of the week.

## #forestofpromises

We have been working hard on our promise leaves this term and we have made a beautiful tree with them. The Promises are based on how we can help the environment.

We made eye-catching placards for our climate protest. Then we did a peaceful protest at the school gate to demonstrate our right to be taken seriously and to share our thoughts freely on matters that affect us.

## #readysteadycook

## #litterpick

We have been learning about the importance of growing seasonal fruit and veg and buying local produce to help reduce our carbon footprint. The Red Tomatoes team - Angus, Kyle, Rosalie and Connor - made a delicious vegetable soup. With our own courgettes and squashes! The Green Peppers team - Cara, Tommy, Duncan and Beatrix - made a flavoursome apple and Bramble crumble. With berries and apples from the school grounds!

By Cara Forrest, Pupil Council Chair
