

Quarterly magazine curated by and for the Kyle of Sutherland children

Rosehall pupils making their own pizza!

Bonar Bridge Primary school had a visit from a SSPCA representative.

## Fun-packed term

Local children had a busy winter term, with fun activities such as visits to a farm or to the beach, also learning about wildlife and even cooking their own food!

Gledfield PS pupils had a great time at the beach as part of the Junior Award Scheme Scotland Adventure.

## #triptothebeach

It may sound crazy but both classes in Gledfield had brilliant trips to the beach, in JANUARY! As part of our Junior Award Scheme Scotland Adventure both classes went to Inver beach. We explored the shoreline, had a lovely walk, searched for shells and had hot chocolate at the Inver Inn. The sun even made an appearance, the best trip ever according to P1, 2 & 3.

## #titanic

P1-4 are studying the Titanic for their project this term. We would love for members of the community to get in touch if you know of anyone local to Ardgay or Sutherland who was on the Titanic or who had family links to it. We look forward to hearing from you.

## #wildlifeinourplayground

Marcia the Countryside Ranger explained about different Scottish mammals, past and present, to everyone in P4-7. She showed us how to set up her tracking camera. We were all excited to see what we would 'capture'. P7 also managed to set up another camera and place that in our wildlife garden. Our wildlife garden is a fenced off area with a pond and some trees. After a week we looked at the camera. We saw birds including a robin, a cat called Solo and even some mice! When Marcia comes next time we're going to set up a tunnel with ink in it to see some tiny mammal footprints. I like the wildlife ranger coming. I can't wait to see her again. **By Grace, P5**

## Gledfield Primary

## #football

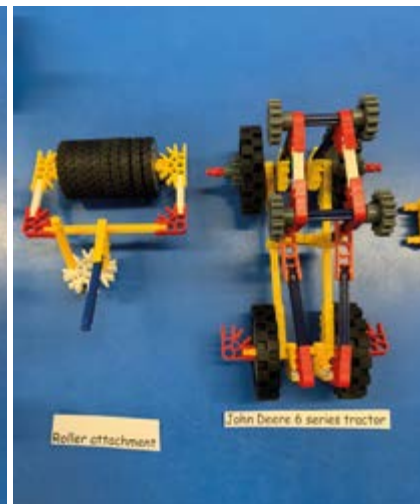

Our P6 pupils have started a football training session for our P1-4 pupils. It has been a great success so far and will continue to improve as they are going to be involved in Junior Leaders training with our Active Schools Coordinator. Well done to Rebekah and Magnus for their great initiative and kindness towards their fellow pupils.

## #teachtheteacher

P5-7 has a mini topic called Teach the Teacher, where we write about things pupils know a lot about but our teacher doesn't know anything! Some of the things we have chosen to teach her about include, Making your own Youtube channel, important footballers, Marvel movies, cool places that people our age enjoy, video games and playground games. We are going to make a quiz to see if our teacher has learned anything new!

**By Magnus P6.**

Angus and Max created different tractors and lots of tractor attachments to teach our teacher about important farm machines and the jobs they do.

### Bonar Bridge Primary

### #ww1familystories

Pupils brought along photos, medals, newspaper cuttings, etc to share their family WW1 stories with the class.

### #burnsnight

Celebrating at school with haggis, neeps and tatties!

### #farmvisit

At the Early Years Class we have been learning all about farms! We are so lucky to have Sworddale Farm right on our doorstep and they very kindly took us on a tour where we learned more about farms, the animals and the farm's equipment. Farmer Sandy showed us around his cattle shed and introduced us to some cows and the bull - the bull was definitely the star of the show! We also got

to see some different farm equipment and learned how the different machines help the farmers. We even got to enjoy a turn on their quad bikes! We also got to visit and learn more about the sheep. Sandy was very kind and invited us back in April to see the lambs. Hopefully the sun will shine! We are very thankful and appreciative to Sworddale Farm for allowing us to visit them and we look forward to our visit in April!

Rosehall Primary

## Around Europe in 60 days

### #passporttoeurope

For topic this term, we have been learning about Europe. Each week we travel to and research a different region of Europe. Gathering information from each country, we write important facts and stats files in our passports. So far, we have travelled around the British Isles, Scandinavia, Western Europe and Southern Europe. We have also been learning some simple phrases in French, Spanish, Italian and German.

### #readysteadypastaandpizza

During Southern Europe week, we created two Italian classics, pizza and pasta. Trying to reduce our food waste, we used left over fruit and veg from our weekly fruit bowl order to create an Italian feast. Team Pizza – Tommy, Lowenna, Lochlan, Rosalie and Beatrix – made delicious pizzas. Team Pasta – Angus and Cara – made an incredibly tasty tomato, spinach and salami pasta. We used our left over ‘ugly’ fruit to create a healthy fruit salad dessert and a tangy lemon water. Squisito!

### #STEM Challenge

During Western Europe week, we were challenged to be Structural Engineers for the day. Using only Blue Tac, straws, paper clips, and our imaginations we had to re-design and build the Eiffel Tower. It was tricky work, but we had lots of fun trying to meet our success criteria.

### #factsandstats

### Countdown to Euroquiz

Last year, we competed in the Euroquiz and placed 3rd during the Highland heats. Our composite team did incredibly well last year, so we hope to go even further this year! Beatrix did an excellent job of creating a countdown clock to help keep us on track. Good luck, Team Rosehall!
