Rosehall Primary pupils tidying up the garden

Schools are back!

Pupils are busy meeting friends and making new ones. Local schools offered them many activities to enjoy the spell of mild weather at the beginning of the term.

Picking berries at Gledfield Primary.

Splashing in the burn!
Bonar Bridge Primary

#learningtoplayhockey5-p7

“To be good at hockey you have to keep your eye on the ball all the time. You have to be agile and alert and pass the ball to your teammates. Hockey is good for our health and wellbeing in lots of ways. It makes your heart and lungs work hard. It is a workout for our leg muscles too. It burns a lot of energy. It is good fun to play with friends. It was fun playing in a match.

#nursery

We have four new pupils who are having lots of fun getting to know each other and the Nursery staff and enjoying all that Gledfield has to offer.

Gledfield Primary

#growingour own

Our playground fruit trees are bursting with fruit this year and our canteen is going to use the fruit for fruit tarts for pudding next term. During the summer our polytunnel was completed. We are looking forward to getting some planting done and some growing started.

#newp1pupils

#allbacktoschool

All the children had a lovely, relaxing summer holiday and are ready for (hopefully) a full year of learning in school.

#allaboutme

Bonar Bridge Primary

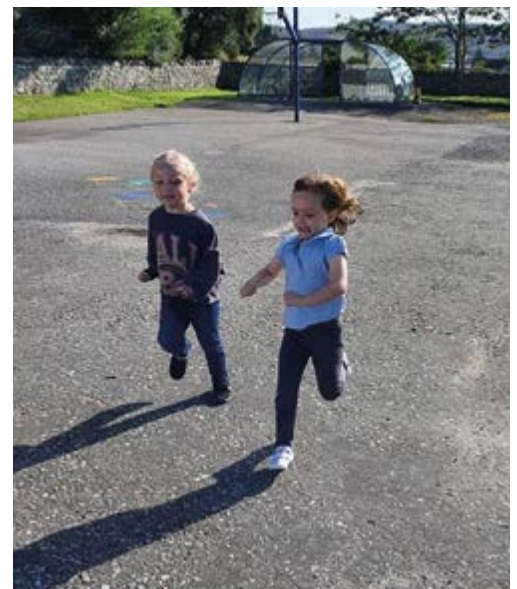

#walktothewoods

We have already been very busy in the Early Years Class this term! Every week we take a walk to the woods where we have not only been enjoying the lovely weather, but we have especially been enjoying splashing in the burn.

During our 'All About Me' topic, we have been exploring what makes each of us unique, as well as how we are unique from each other. We even made our faces out of fruit during snack!

#keepactive

Each week we have also been getting in lots of physical activity with our gym sessions, where we have been learning and playing different tag games. In addition, we have also been participating in the daily mile walk.

#kandinsky

Rosehall Primary

The children have been learning about primary colours and how to mix to make secondary colours. They learned about the artist Kandinsky and how he used colour and shape to express his feelings. We tried to recreate his work the Concentric Circles.

#gardening

After a warm summer the garden looked as it needed a little bit of attention. Everyone set to work to give it a tidy up.

#firstdayback

#science

The children, working collaboratively in teams conducted science experiments using balls and plasticine in order to slow the ball down.
