## **KEY SAFE LOCATIONS**

In cases where there is a direct risk to life (such as flooding, explosion/fire, major accident) an emergency plan will be activated and managed by the emergency services. Community involvement and support may be important or vital. In cases where there is no direct/immediate risk to people's lives (such as prolonged power outage caused by severe weather) the local Resilience Group will stay in contact with the emergency responders.

SSEN Priority Services Register: A power cut can be distressing and difficult. SSEN offers extra help and support to vulnerable people during a power cut. To sign up, please call 0800 294 3259 or visit www.ssen.co.uk/priorityservices/ for more information

## **SNOW & ICE**

#### Snow and ice can disrupt our lives in lots of different ways.

It can cause frozen or burst pipes, transport disruption and even risk of hypothermia. Then when the snow thaws, a risk of flooding can follow. Because winter can be a particularly difficult time for elderly or vulnerable people, the following advice mentioned below is to make sure you, and those around you, have the help and support you need.

#### In Advance

- Make sure you've signed up to the Met Office for the latest weather warnings/updates.
- Make sure you have storage of food, water, prescription medicines and torches.
- Check on vulnerable neighbours or relatives and help them to prepare. Make sure they're aware of the support available to them during cold weather, including the SSEN Priority Services Register. To register, please call **0800 294 3259**.
- Keep up-to-date with the latest weather warnings, travel advice and road conditions by visiting www.trafficscotland.org.

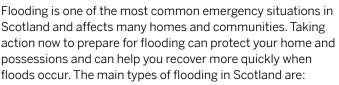

### **In Cold Weather**

- If you lose power, call 105 it's free of charge and will put you through to your local network operator who can give you help and advice.
- Make sure you can keep as warm as possible, wearing layers, and keeping at least one room in the house heated.

#### After Spewfall /lee

- Take extra care when cycling, walking or driving. Leave a safe distance when driving your stopping distance is increased by 10x in snow and ice;
- Stay off frozen water
- Make sure that vulnerable neighbours or relatives are safe
- Before attempting to thaw out your pipes, check for leaking joints or bursts. If there are none, and if it's safe to do so, gently warm any frozen sections with a heated cloth wrapped around the pipe. **Never apply a direct flame or attempt to thaw pipes by switching on your immersion heater or boiler.**
- If you're fit, well and able; clear and grit paths and pavements (clearing fresh snow is easiest, and avoid using hot water, which could quickly turn to ice).

## **FLOOD RISK**

- **River flooding** when rivers and burns burst their banks due to high volumes of water
- **Coastal flooding** high tides and storms create unusually high sea levels or big waves
- **Surface water flooding** heavy rainfall fills the drains and sewers which then overflow.

**Know your risk** – check SEPA's flood map to see if the area you live in is at risk of flooding. https://www.sepa.org.uk/environment/water/flooding/flood-maps/

**Sign up to Floodline** at www.floodlinescotland.org. uk to receive text alerts so you get advance notice of impending floods.

**Create a flood plan** – make sure you've thought about all members of the family and don't forget about your pets. **Prepare a 'grab bag'** of essential items. Remember you may be out of your house for days.

## What goes into a family flood kit?

It should include a torch, first aid kit, warm and waterproof shoes and clothing, supplies of prescription medicines, bottled water, food, rubber gloves, children's supplies, pet supplies, insurance details, portable radio and spare batteries, and a rucksack in case of evacuation.
